Practical AI Transformation for Growing Businesses

Built for startups and growing businesses that
want AI to improve real operations.

COMPANY **SNAPSHOT**

Neberox helps growing businesses turn complex technology into practical systems that make daily work faster, clearer, and easier to manage.

We engineer
intelligent systems
that move
businesses forwards

We work with startups, small businesses, and ambitious teams that want to move beyond manual processes, disconnected tools, and slow decision-making.

Our focus is simple: Make AI, automation, data, and custom software useful in the real world, not confusing, not overcomplicated, and not built for show.

WHY CLIENTS **CHOOSE US**

We help businesses modernise with systems that save time, reduce errors, improve visibility, and support long-term growth.

Practical AI

Real business use cases that save time and reduce manual work

Faster Operations

Streamlined workflow across admin, support, reporting and customer service

Better Visibility

Dashboards, reports and insights from scattered business data

One Trusted Partner

AI, automation, software and data handled by one connected team

Built for Growth

Scalable systems designed for long-term business growth.

Let's modernise your operations

AI • Automation • Data • Custom Software

MISSION

To help businesses turn AI, automation, and data into practical solutions that simplify operations, save time, and drive sustainable growth.

VISION

To become a trusted partner for businesses worldwide by building intelligent systems that empower teams and shape the future of work.

OUR CORE VALUES

INTEGRITY

We do the right thing, always.

RELIABILITY

We deliver on our promises.

COLLABORATION

We work together to achieve more.

INNOVATION

We embrace new ideas that create real impact.

ACCOUNTABILITY

Our take ownership and deliver results.

AI Strategy & Consulting

We identify high-impact AI opportunities and create practical roadmaps that deliver real business value.

Custom AI Solutions

We build custom AI tools, copilots and knowledge systems designed around your workflows and goals.

Automations & AI Agents

We automate repetitive tasks and business processes with intelligent agents that improve speed, accuracy, and efficiency.

Data Intelligence & Dashboards

We turn scattered data into meaningful insights with dashboards, reporting, and predictive analytics.

Web & Mobile Apps

We design and develop web systems and mobile apps that connect users, systems and data seamlessly.

WHAT WE DO

We design and build intelligent business systems that automate work, connect data, and improve how teams operate.

From AI strategy and workflow automation to dashboards, CRMs, business portals, mobile apps, and knowledge platforms, we create solutions built around real business needs.

We help replace repetitive admin, scattered spreadsheets, and disconnected tools with smarter workflows that are easier to manage and ready to scale.

The result is clearer operations, better decisions, faster processes, and technology that works with your team — not against it.

CUSTOM AI TOOLS

We build custom AI tools that help businesses automate work, answer questions, generate content, and support faster decision-making.

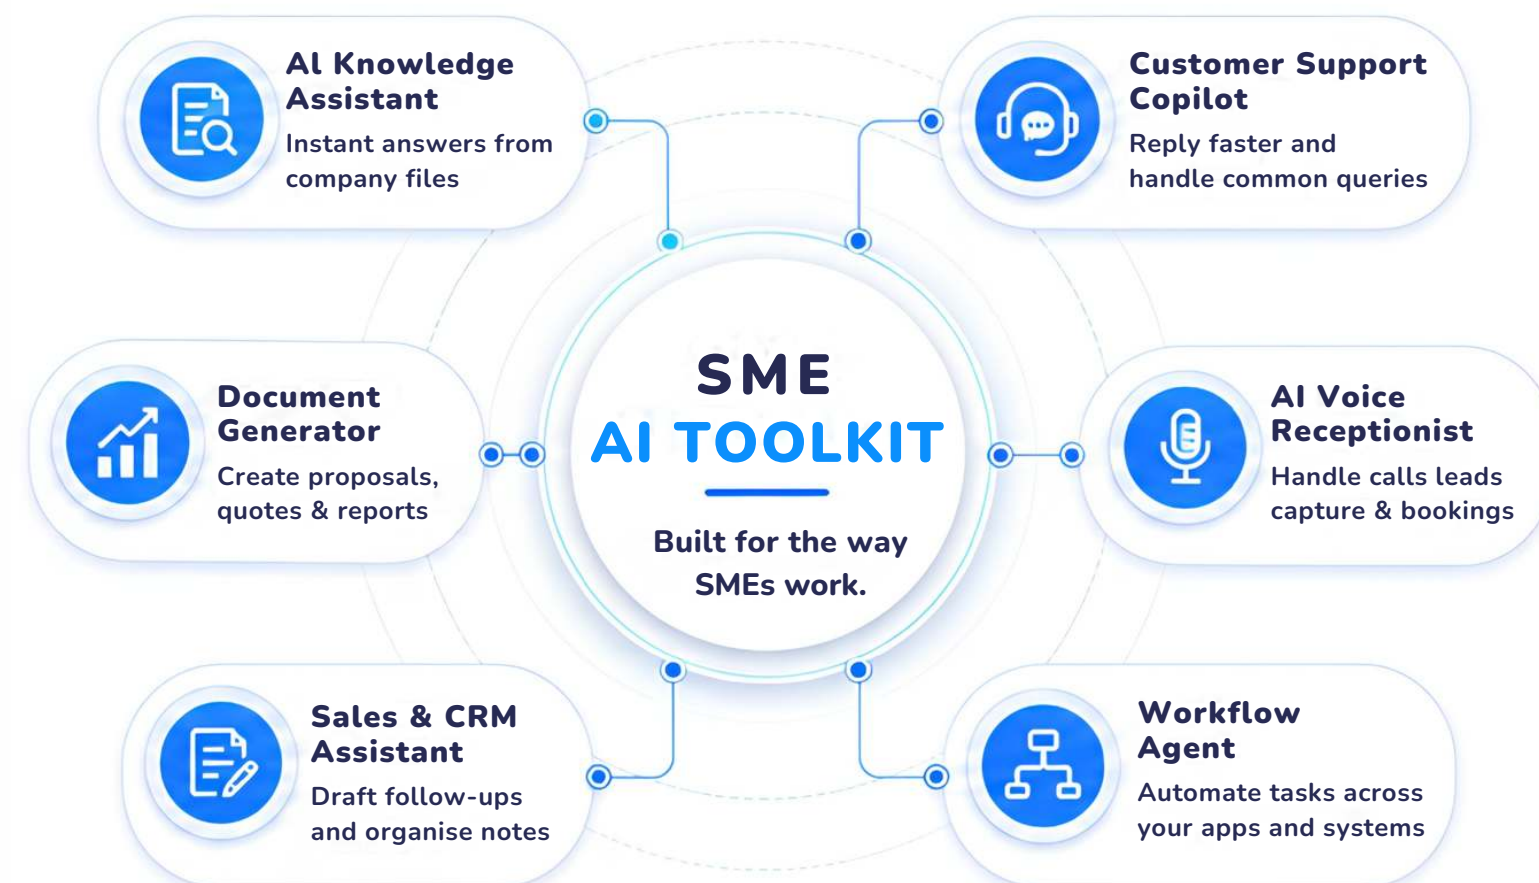

From internal AI assistants and knowledge search to customer support bots, voice agents, and document workflows, we turn practical AI use cases into usable business tools.

The result is less manual work, faster service, better visibility, and AI that fits the way your business already operates.

AI should not feel complicated.

It should help your team work faster, serve customers better, and make daily operations easier to manage.

- **Customer support**
Reply to common questions faster and keep answers consistent.
- **Sales and follow-ups**
Draft proposals, emails, summaries, and CRM notes in minutes.
- **Documents and admin**
Create reports, quotes, contracts, and summaries with less manual effort.
- **Knowledge access**
Turn company files, policies, FAQs, and training material into instant answers.
- **Voice & operations automation**
Handle calls, capture leads, manage bookings, trigger tasks, reminders, approvals, and updates across business tools.

One app is not enough

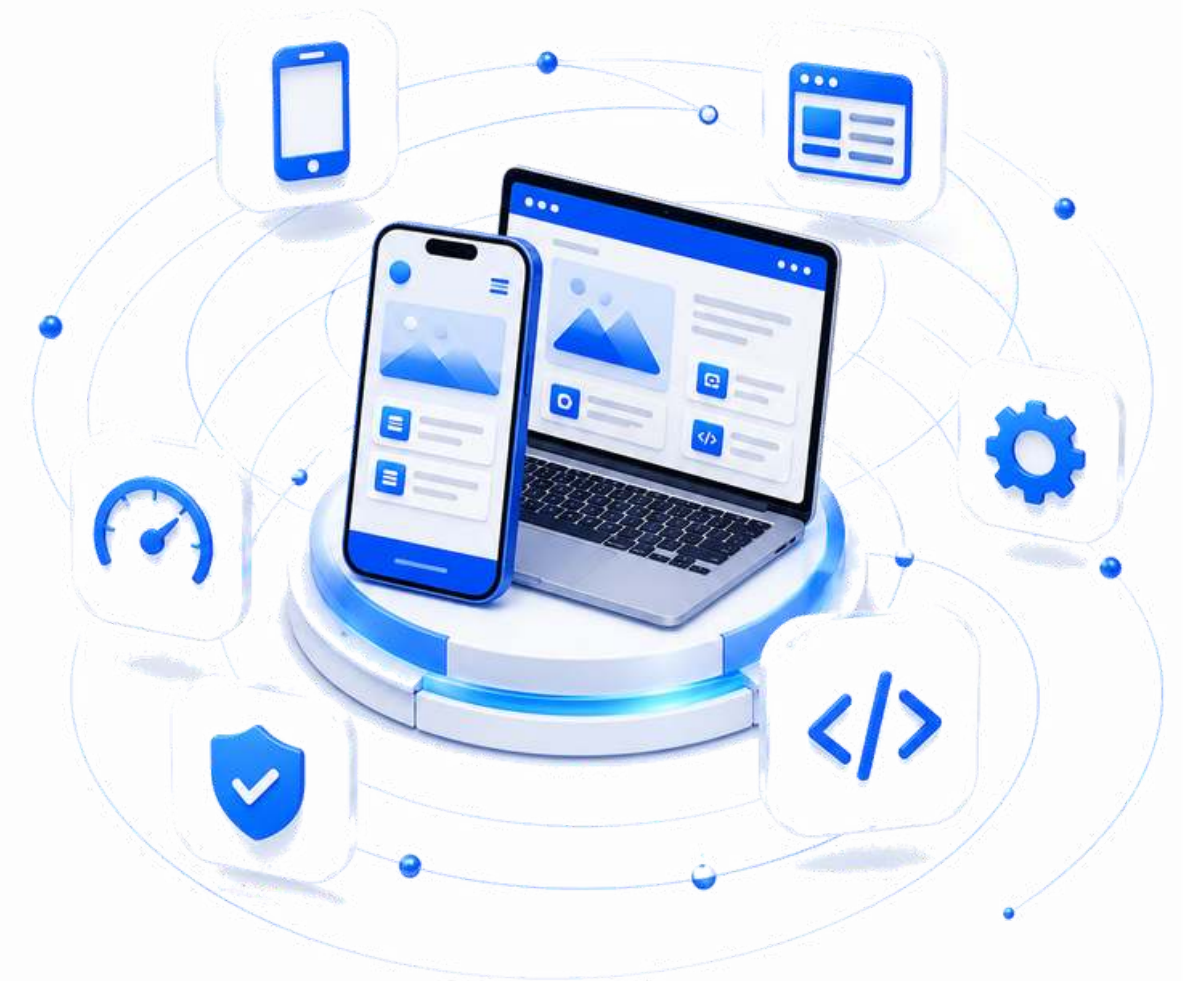

We build the system behind it

Mobile apps, web portals, admin dashboards, payments, notifications, analytics and back-end systems, connected properly so your business runs on one reliable platform

Built to work together

One connected digital system your team can manage

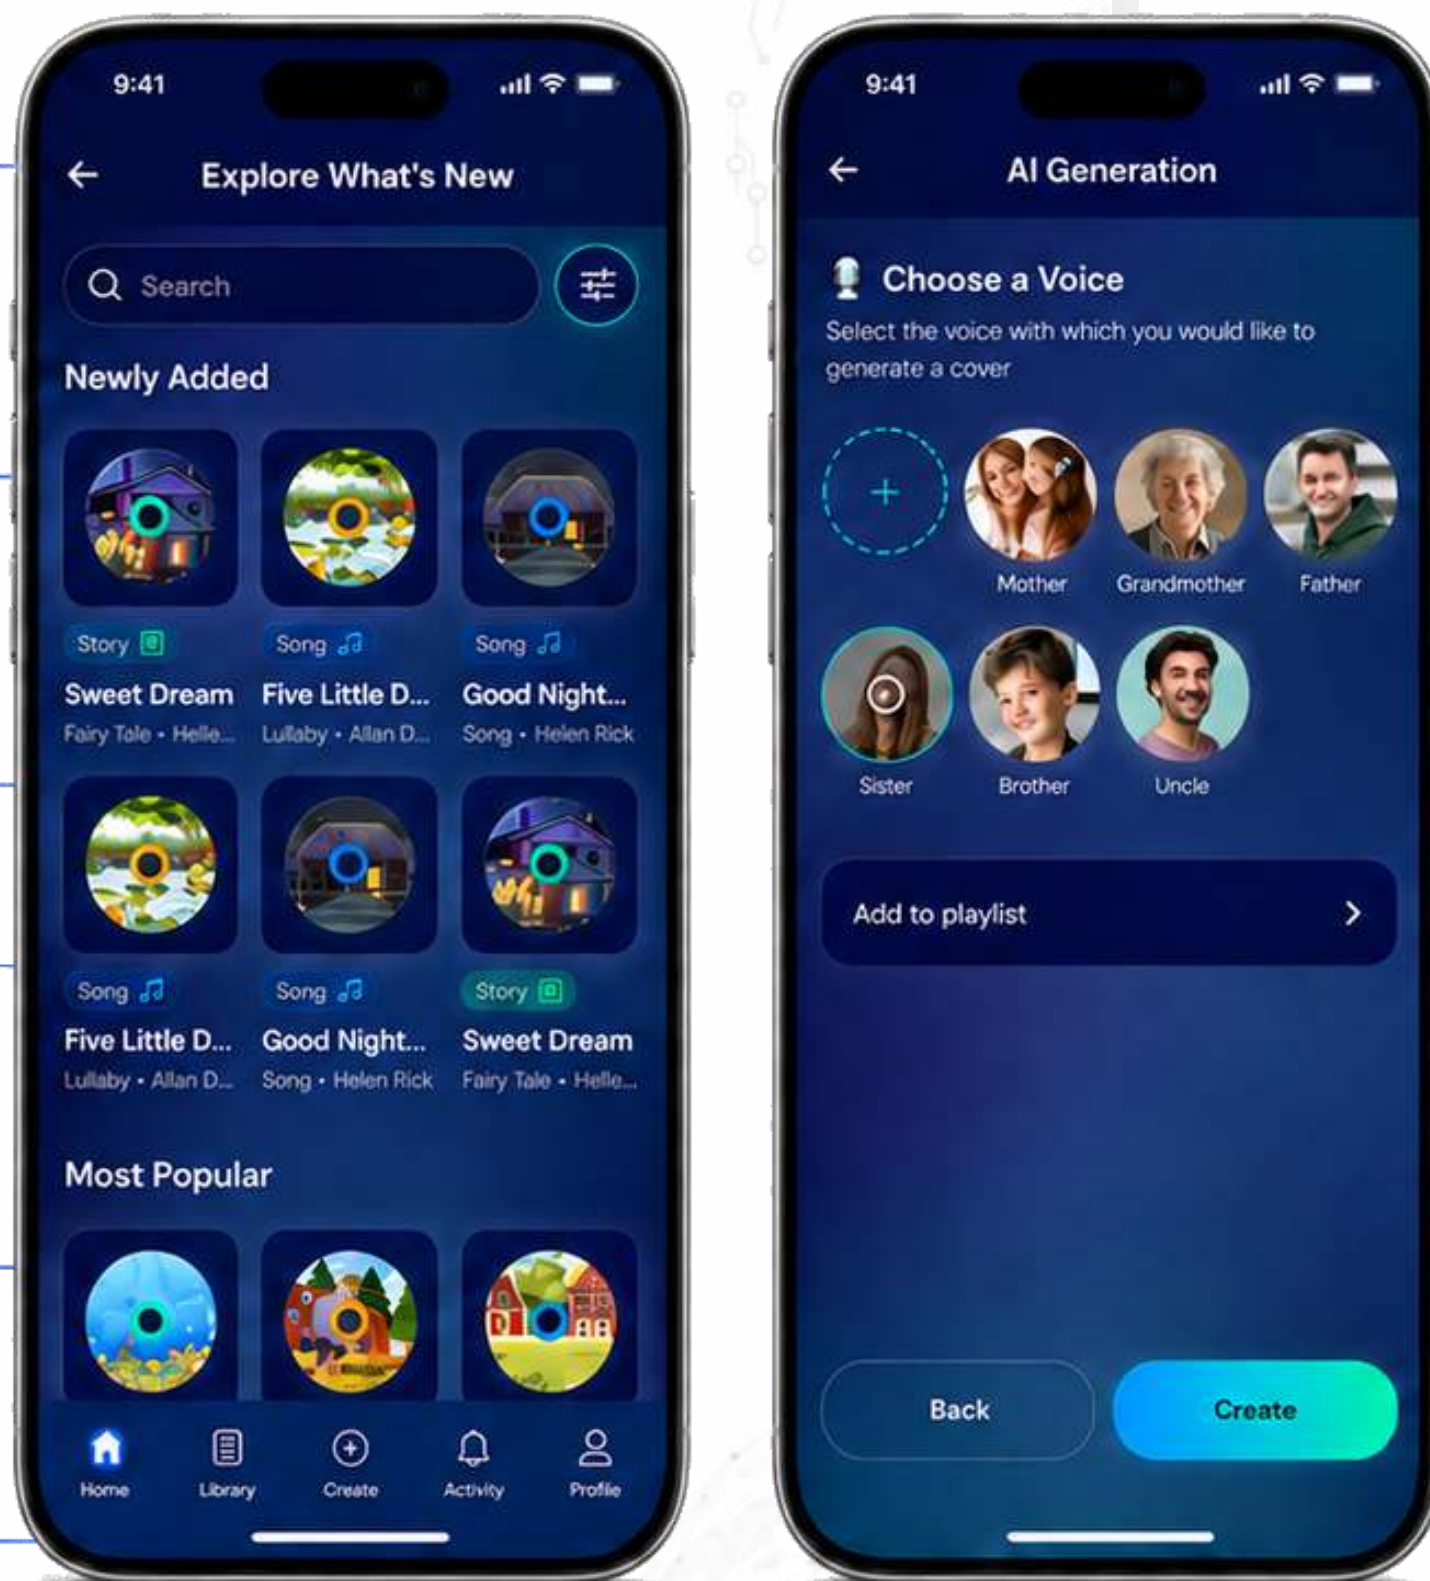

WEB & MOBILE APPS

Build your own complete digital ecosystem

Neberox designs and builds complete web and mobile ecosystems that connect your users, content and operations.

From customer apps and user accounts to content libraries, subscriptions, notifications, admin tools, analytics and scalable back-end systems. We build everything you need to run and grow.

User accounts
Secure sign up & management

Search & Discovery
Find content and features easily

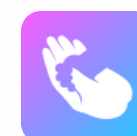

Push notifications
Engage users with timely updates

Responsive UX
Fast, consistent experience

Admin Dashboard
Manage content, users and insights

Secure backend
Built for reliability and compliance

Featured Client

Bond By Voice

Record your voice in seconds, and Bond by Voice seamlessly replaces standard vocals in lullabies and stories with your voice or family member's voice.

AUTOMATIONS & AI AGENTS

**Automate Repetitive Work.
Empower Your Team.**

We build intelligent automations and AI agents that handle repetitive tasks, streamline operations, and support your team around the clock.

From lead capture and customer support to document processing and internal workflows, our solutions save time, reduce errors, and help you scale with confidence.

MORE WAYS WE CAN HELP

OTHER BUSINESSES WE HELP

More automation. Less manual work. Smarter operations.
That's how we help businesses grow.

Featured Client

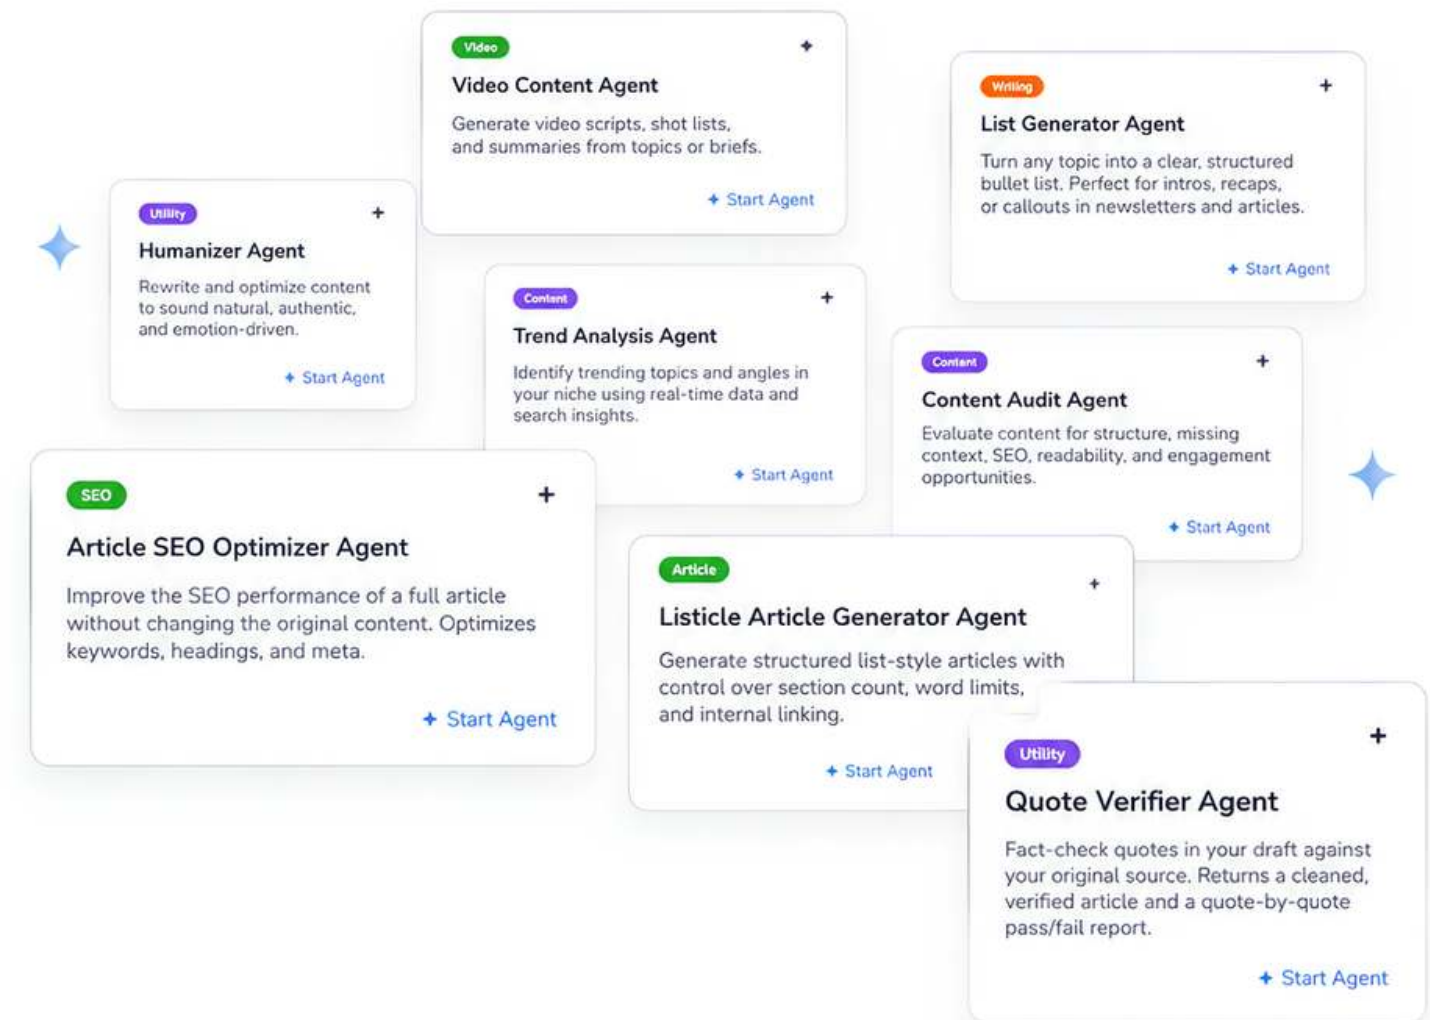

AI Agent Platform Development

We built the complete platform that helps Ongage Studios create, configure, and launch AI agents for their clients.

The system makes it easier to turn business requirements into working AI agents, reducing manual setup and helping teams deliver automation faster.

AI Content Agent Library

Pre-built agents for repeatable content tasks, reviews and publishing workflows

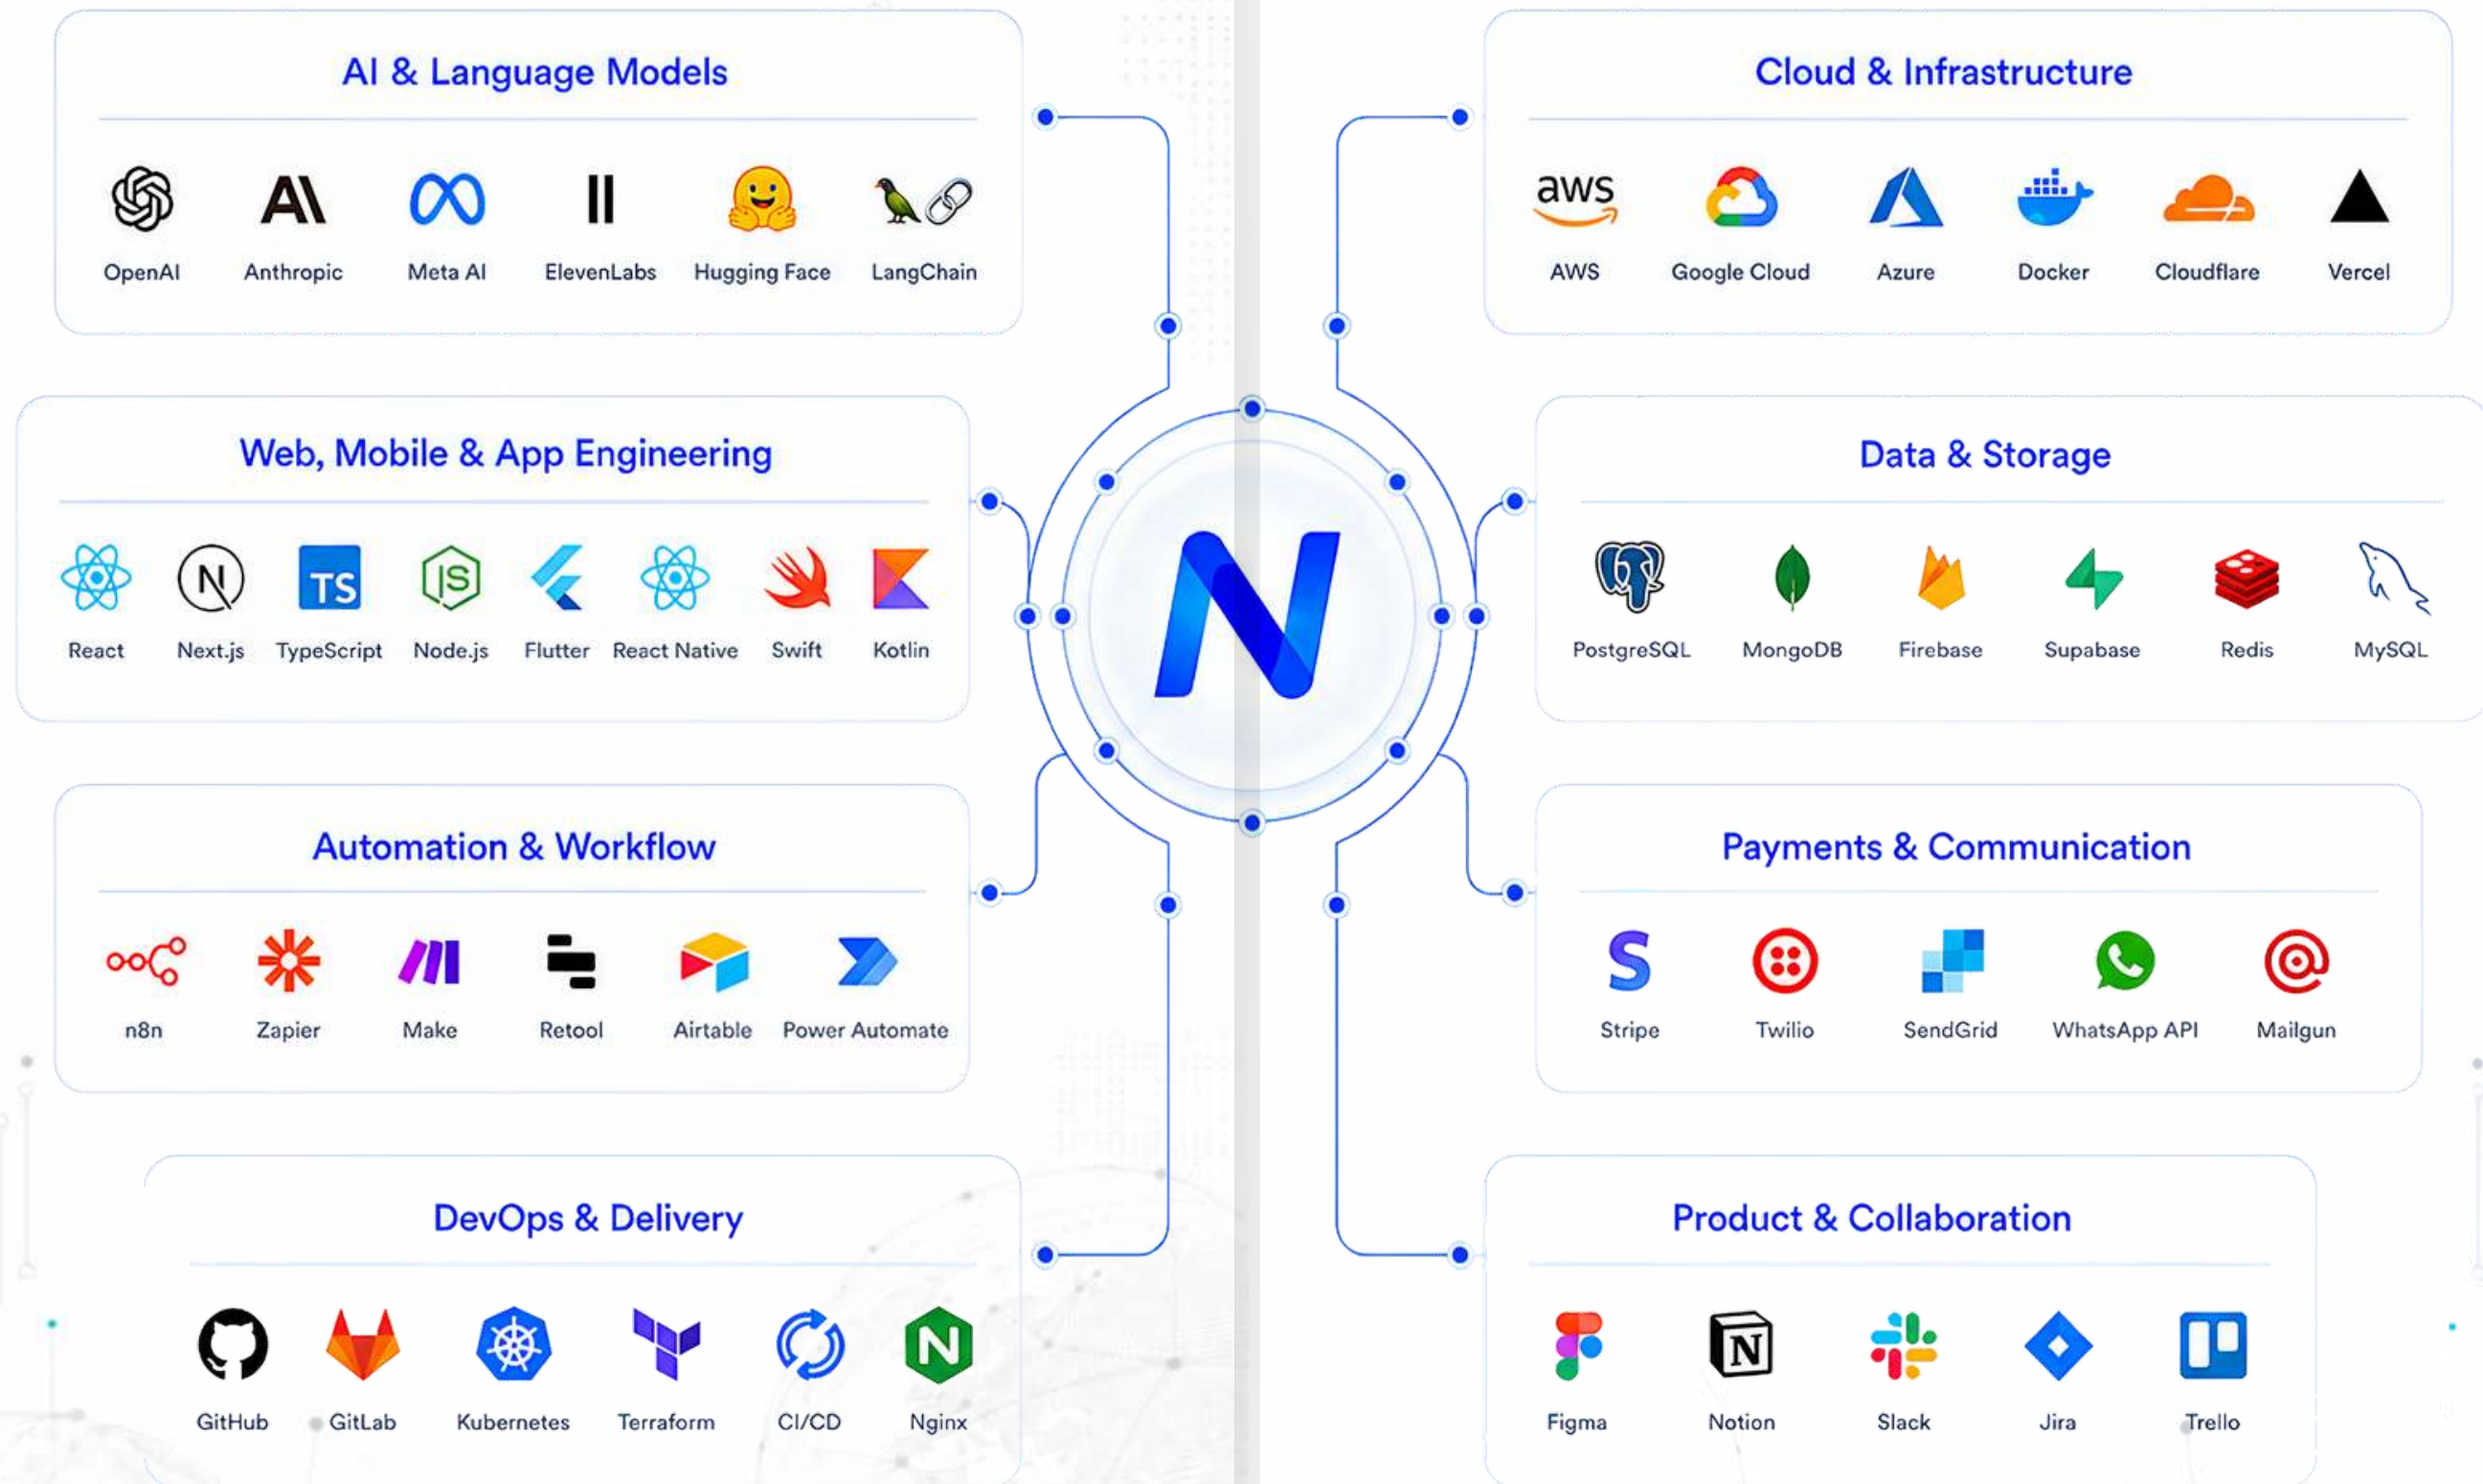

Result

Ongage Studios moved from manual AI agents to a structured platform that helps teams create, configure and deliver automation faster

OUR TECHNOLOGY PARTNERS

Platforms we use to build AI, automation, data and software solutions
